INTRODUCTION

The Vendo double track serpentine coolers with new "cold vault" design offer cooler maintenance without product warm up, cost and labor saving features, and greater security.

Two doors with a common pivot point allow each door to operate separately. Inner refrigerated compartment door can remain closed during maintenance, eliminating product warm up and additional pull down time. Both doors, as a single unit with a second key required to separate the two doors before access is possible to the coin changer. The outer lock is factory installed.

The double track serpentine cooler vends all domestic 10 and 12 ounce cans without modification to the stack or vend mechanisms. The vend mechanism is solenoid actuated with a fast vend cycle of one second — from selection — to exit through delivery door.

The built in loading rack on the front of the stack (on larger models) provides for easy loading of cans into the first in — first out serpentine stack.

MODEL DESIGNATIONS

This parts manual applies to the basic vender and its various model designations as called out below in the model code number. You will find the code on your cooler on the serial number plate attached to the cabinet.

V128-6	01C1280AC	Coca-Cola - 6 select
V192-6	01C1920AC	Coca-Cola - 6 select

PARTS ORDERING PROCEDURE

When ordering parts, include the following information:

1. Shipping address.
2. Address where the invoice should be sent.
3. The number of parts required.
4. Always refer to the pertinent parts and/or service manual for the correct part number and description of a specific part.
 - a. If you do not have the right parts manual at the time you order, contact The Vendo Company, Customer Services Division, 999 Corrington Avenue, Kansas City, Missouri 64126. They will provide a copy for you.

Don't hold the order pending receipt of the parts manual - use the most accurate description you can (and the model number and serial number of the machine); include the name of the assembly in which the part is used and, if practical, a sample part. Furnish any information which will enable our order department to pinpoint the exact part needed.

- b. When "RIGHT" and "LEFT" are used in connection with the name of a part, it is taken to mean that the person is facing the machine.
5. Always include model number and the serial number of the machines for which the parts are needed on the order.
6. List any special shipping instructions.
 - a. Always note on the order if you require air or air special, truck, parcel post, or rail. If a specific carrier is desired, note it on the order.
 - b. The Vendo Company pays freight on shipments unless air or other premium methods are requested.
7. Sign the order and note the date entered on the order.
8. When a purchase order number is used, be sure that it is legible and visible.

Mail your order to:

The Vendo Company
Customer Services
999 Corrington Avenue
Kansas City, Missouri 64126

All orders are carefully packed and inspected prior to shipment. Damage incurred during shipment should be reported at once and a claim filed with the terminating carrier.

MATERIAL RETURN PROCEDURE

All parts or assemblies returned must be accompanied by material return tags clearly stating the reason for return. (Tags are available on request.)

To replace an inoperative part within the terms of the warranty, please follow these instructions.

1. If a replacement part was taken from the available parts stock and installed on the machine, proceed as follows:

Complete a material return tag. Be sure all of the requested information is written in.

Keep the white (top) copy.

Attach the tag to the inoperative part and send it by the cheapest method of transportation to: The Vendo Company, 2001 Arthur Avenue, Elk Grove Village, Illinois 60007. The exception to this is refrigeration units and ice makers which must be shipped to: The Vendo Company, 999 Corrington Avenue, Kansas City, Missouri 64126.

A like part will be shipped, prepaid, at no-charge, if our inspection shows the inoperative part became defective in warranty.

If a part does not meet the terms of the warranty, it will be replaced with a new part and invoiced accordingly. The returned part will be scrapped to eliminate further handling charges.

2. If a spare part is not available to put on the machine, order the part required. Use the postage-paid air mail order form provided by the Customer Services Division of The Vendo Company. The part will be shipped and invoiced to you. After the replacement is received, follow the procedure as outlined above under Number 1.

For major components which are impractical to stock for normal replacement activity, order a replacement using the postage-paid air mail order form.

The part will be shipped and billed.

After exchange of the part on the machine, complete a material return tag. Check the box marked "Credit our account Invoice No." on the material return tag. Fill in the invoice number.

Attach the tag to the inoperative part and send it by the cheapest method of transportation to: The Vendo Company, 2001 Arthur Avenue, Elk Grove Village, Illinois 60007. (Refrigeration systems and ice makers to: The Vendo Company, 999 Corrington Avenue, Kansas City, Missouri 64126).

If our inspection shows the inoperative part became defective in warranty, a credit will be issued to cancel the invoice on which the replacement part was shipped. This credit will include any prepaid transportation charges. To receive credit the inoperative part **MUST** be returned within 30 days from the date the replacement was shipped.

We do not issue cash credit for the return of any part or accessory.

THE VENDO COMPANY MATERIAL RETURN TAG PLEASE COMPLETE ONE FOR EACH ITEM RETURNED

READING A PARTS LIST

1. Step 1 is the Door Final Assembly Complete. Anything indented (A) under that part is a detail part of the assembly and will be included in that part number.
2. Step 2 is an assembly which is a part of the Door Final Assembly Complete. Example: Sign Assembly – Any part indented (B) under the Sign Assembly is a detail part of that assembly.
3. Step 3. This step shows that the parts, which are not a part of the Sign Assembly, return to the left in line with the Sign Assembly thus continuing the Door Final Assembly. All parts indented under the Door Final Assembly Complete are part of the Door Final Assembly and all parts indented under the Sign Assembly make up the Sign Assembly.
4. Step 4 shows individual parts. This shows that any part that is not indented under an assembly is not part of an assembly on that page.
5. In the Item Number column, a dash may appear. The dash may mean one of two things; the item described is a complete assembly, or the item is a detail part not shown in the drawing.

	ITEM NO.	PART NO.	NO. REQ.	PART NAME AND DESCRIPTION
